

## Conservation Design Forum

Ecological Design Services • Landscape Architecture • Planning • Civil / Water Resources Engineering  
Sustainable Urbanism • Ecosystem Sciences

### **Conservation Design Forum Employment Opportunity**

Conservation Design Forum (CDF) is a multi-disciplinary firm composed of engineers, landscape architects, and ecologists dedicated to the principles of sustainable land planning, design, development, and long-term systems management. Since 1994, CDF has been pioneering low impact design solutions to rural, suburban, urban, and ultra-urban environments, including infill and redevelopment sites.

Conservation Design Forum is now accepting applications for a Civil & Water Resources Engineer.

#### **Site Civil & Water Resources Engineer**

CDF is seeking a talented civil engineer interested in creative approaches to sustainable site design, and water resource-based land planning and design. Candidates should be self-motivated with excellent communication and learning skills, and be interested in working in a team environment. The position will involve a wide range of responsibilities including stormwater green infrastructure planning and design (bioretention, permeable paving, green roofs, naturalized drainage and detention), civil design (including preparation of construction plans and specifications), project management, permitting, and construction administration. For more information visit [www.cdfinc.com](http://www.cdfinc.com).

#### *Preferred experience:*

- Bachelor's degree in Civil Engineering (M.S./M.E. preferred)
- PE licensure or ability to obtain PE within approximately one year required.
- LEED AP a bonus
- Three to ten years experience
- Strong AutoCAD Skills
- Knowledge of stormwater models
- Knowledge of GIS a bonus

#### **To apply, please send resumes to:**
