Employment Opportunity

CIVIL ENGINEER I (E.I.T.)

Posted: January 25, 2018

Position Summary

Unique opportunity to work for a thriving community in the Western Suburbs with steady residential and commercial redevelopment and public infrastructure projects. This is a professional entry level civil engineering position overseeing private and public construction projects within the City. Opportunities will include exposure to stormwater, domestic water supply, sanitary sewer, private utility, and residential/commercial development fields. The position will analyze and interpret complex engineering construction and planning documents for compliance with City requirements. The position also encompasses design/construction of private development, public works and utility projects and will provide information assistance to the public and City staff regarding City standards, policies and programs. Work is performed under the direction of the City Engineer.

Qualifications

- Bachelor's Degree in Civil Engineering, or the ability to obtain within 6 months.
- Registration as a Professional Engineer-in-Training (E.I.T.) in the State of Illinois or other state, or ability to obtain within 6 months.
- Prior work experience in a municipal environment preferred.
- Knowledge in computer applications including Microsoft Office.
- AutoCAD experience a plus.
- Valid Driver's License required.
- Ability to lift and carry up to 20 lbs.

Wage: \$64,000 that includes excellent benefits and pension.

Interested candidates are encouraged to apply immediately.
