Department: Planning and Development
Location: McHenry County Government Center
Job Code:
Number of openings: 1

POSITION DESCRIPTION

Under general supervision, the Water Resources Engineer assists property owners and contractors obtain stormwater management permits; reviews engineering plans and other permit submittals; and conducts field inspections for compliance with County, State and Federal regulations and laws. The Water Resources Engineer reports to the Water Resources Manager/Stormwater Chief Engineer.

ESSENTIAL FUNCTION:

- Assists property owners, contractors, and the public with questions regarding drainage and stormwater management, including providing assistance with filing stormwater management permit applications.
- Reviews engineering plans and permit submittals for compliance with County, State and Federal regulations regarding stormwater management, floodplain management, and wetland protection.
- Conducts inspections and monitors construction projects for compliance with approved plans and applicable regulations.
- Participates in preparation of the County's MS4 NPDES annual permit application and report.
- Assists with the County's participation in the National Flood Insurance Program and Community Rating System program.
- Assist with the review and update of the Stormwater Management Ordinance, policies, procedures, and forms to ensure better management of water resources and improve customer service.
- Maintains and upgrades professional knowledge, skills and development by attending seminars and training programs and reading trade and professional journals and publications.
- Performs other related duties as assigned.

QUALIFICATIONS:

- Bachelor's degree from an accredited four-year college or university in Civil or Environmental Engineering or related field.
- Four or more years of related experience

LICENSES AND CERTIFICATIONS:

- Professional Engineer (PE) License or an Engineer in Training (E.I.T) with the ability to obtain PE license within six months.
- Certified Flood Manager (CFM) preferred, but not required.
- Certified Professional in Erosion and Sediment Control (CPESC) or similar certification preferred, but not required.
- Unrestricted Class D Illinois Driver's License.

KNOWLEDGE, SKILLS AND ABILITIES:**Knowledge of:**

- Stormwater management principles and stormwater engineering design.
- Floodplain and wetland regulations
- Plan review (i.e. quantity take-offs, reading blueprints, etc).
- Hydrologic and hydraulic calculations.
- Geographic Information System mapping.

Skill in:

- Preparing clear written review letters and reports; utilizing word processing and spreadsheet software.
- Communicating clearly and effectively orally in individual and group settings.
- Interpreting ordinances and regulations.

Mental and Physical Abilities:

- Ability to read, analyze and interpret technical procedures and regulations.
- Ability to perform multiple tasks and manage time effectively.
- Ability to communicate complex engineering terminology to the general public.
- Ability to define problems, collect data, establish facts and draw valid conclusions.
- Ability to interpret technical instructions.
- While performing the essential functions of this job, the employee is frequently required to sit, stand, handle, reach with hands and arms, lift and/or move up to 40 pounds and talk or hear.

WORKING CONDITIONS:

- Work is performed in an office environment with quiet working conditions.
- Field work is performed in heavy construction environment with moderately loud operating equipment being used during inspections, surveys, etc.
